Job description

Flexis is seeking a senior product manager to lead our invoicing modularization team. This role is BIG, requiring guts and vision to make invoicing awesome for small businesses around the globe. Prepare to drive the discovery, definition, and execution of experiences on both web and mobile, lead go-to-market plans, and move your metrics!

Key Skills Set:

- Develop product strategy, roadmap, and requirements with a cross-functional team of engineers, designers, product marketing, UI writers, and customer support partners.
- Collaborate with a team of fantastic engineers & designers to ship workflows that change the lives of businesses worldwide. Create and own your success metrics.
- Communicate frequently and clearly with other teams and leaders.
- Ruthlessly prioritize your team's backlog and work across teams to drive work in other areas that deliver value for your target customer.

How you match

How You Match is the checklist you see on the right of the [job](#) description in the above photo.

With its newly unveiled feature, “How You Match”, LinkedIn analyzes if you’re a good fit for a job position. Utilizing your education level, skills, years of experience, and current job title, you can see where you align, and where you may fall short. No matter the job function (e.g. finance jobs, engineering jobs, or marketing jobs), LinkedIn provides you with real-time results.

If you meet most of the requirements, go ahead and apply with LinkedIn’s 1-Click Apply button! If there are some big gaps, you can either make updates to your profile or find a better match.
